## What is Prelox®?

Prelox® is a patented combination of two clinically tested potent ingredients, L-Arginine aspartate and Pycnogenol®.

These important nutrients help protect, restore and sustain blood vessel health and improve blood flow to the genital area, naturally enhancing erections and the body's sexual response.\*

L-Arginine is an amino acid found in most food, that creates nitric oxide in the body. Studies have shown that nitric oxide improves circulation and blood flow to the genital area and plays a critical role in sex drive and ultimate sexual satisfaction.

Pycnogenol® nature's super antioxidant, is made from the bark of the French maritime pine tree

and has been demonstrated in clinical studies to expand arterial blood vessels by activation of the enzyme that turns L-Arginine into nitric oxide. And among its numerous health benefits, it's also

been shown to improve circulation, help strengthen the immune system and neutralize cell-destroying oxygen from free radicals.\*

When these two ingredients are combined they have a beautifully synergistic effect and benefit. By increasing the amount of nitric oxide, a precursor of male sexual response, they enhance responsiveness, sexual stamina and enjoyment.\*

## Why Prelox®?

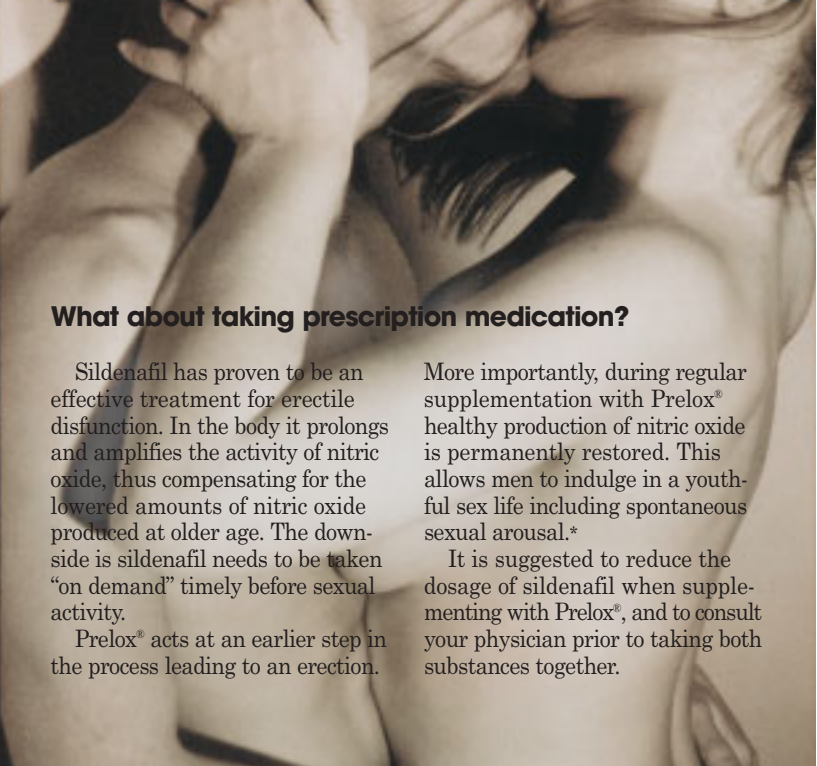

Prelox® is all natural. It's a combination of two ingredients that have never shown any degree of toxicity or harmful side effects. And there are many long-term health benefits to taking Pycnogenol® and L-Arginine in addition to increased sexual performance and pleasure.\*

Prelox® is safe, effective, beneficial and less expensive than many of the other therapies for improving sexual performance.\*

And its benefits can combine to create something that you may not have experienced for some time. A feeling of Sexual Wellness.

## What about taking prescription medication?

Sildenafil has proven to be an effective treatment for erectile dysfunction. In the body it prolongs and amplifies the activity of nitric oxide, thus compensating for the lowered amounts of nitric oxide produced at older age. The downside is sildenafil needs to be taken “on demand” timely before sexual activity.

Prelox® acts at an earlier step in the process leading to an erection.

More importantly, during regular supplementation with Prelox® healthy production of nitric oxide is permanently restored. This allows men to indulge in a youthful sex life including spontaneous sexual arousal.\*

It is suggested to reduce the dosage of sildenafil when supplementing with Prelox®, and to consult your physician prior to taking both substances together.

## The Science Behind The Enhanced Sexual Performance.

In clinical studies, both in the United States and Europe, Prelox® has measurably and scientifically demonstrated its effectiveness in increasing and enhancing sexual pleasure and performance.\*

In a study conducted by Dr. Steven Lamm (New York University School of Medicine, NY) an eminent male sexuality expert, 81.1% of men subjects overall judged Prelox® to be effective in improving their ability to engage in sexual activity.\*

And perhaps the most unassailable scientific evidence of its effectiveness is the fact that Prelox® has been granted a patent (US 6,565,851 B2) for the relief of the symptoms of ED.
